Carbon Reduction Plan

Supplier name: 6point6 Limited

Publication date: September 2021

Commitment to achieving Net Zero

6point6 is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2021 (31 August)	
Additional Details relating to the Baseline Emissions calculations.	
No previous year baselines as this is our first reporting year.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	159.64
Scope 2	10.36
Scope 3 (Included Sources)	1.53
Total Emissions	171.53

Current Emissions Reporting

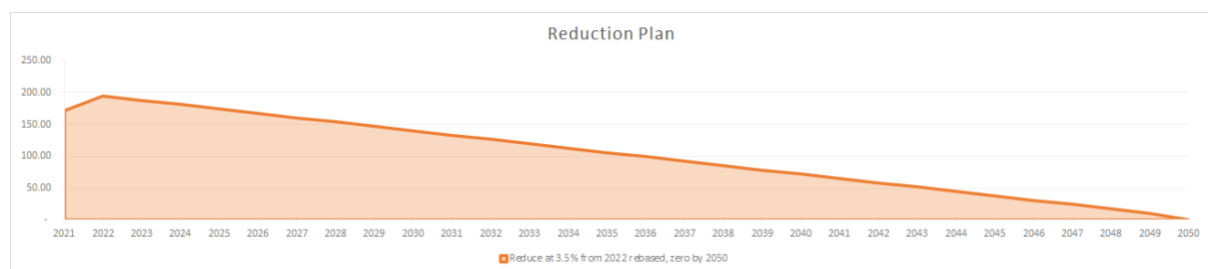

Reporting Year: 2021 (31 August)	
EMISSIONS	TOTAL (tCO₂e)
Scope 1	159.64
Scope 2	10.36
Scope 3 (Included Sources)	1.53
Total Emissions	171.53

Emissions Reduction Targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 167.28 tCO₂e by 2026. This is a reduction of 2%.

Progress against these targets can be seen in the graph below:

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2021 baseline. The carbon emission reduction achieved by these schemes equate to 167.28 tCO₂e, 2%age reduction against the 2021 baseline and the measures will be in effect when performing the contract.

Current and completed carbon reduction projects:

- Our company travel has reduced drastically due to the impact of COVID-19. We have now embraced this new way of working, encouraging our people to continue to work from home, where possible.
- We promote and encourage staff to utilise our Cycle to Work Scheme
- From the new predominantly home-based workforce, we want to improve our ability to measure and monitor our emissions. We have conducted a survey to understand the current usage of green tariffs amongst our employees

In the future we hope to implement further measures such as:

- Promote using green energy to employees by having information events and sharing resources around renewables
- Engage in active conversations about Carbon Reduction Plans with our supply chain
- Promote the Cycle to Work Scheme further by negotiating preferred rates for employees on bike storage near our Head Office
- Ensure that net-zero is a key ambition in all areas of the business (including. people, suppliers, partners and any future mergers and acquisitions)

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:

Jeremy Vickers, COO
